PROFESSIONAL SUMMARY

Junior Software Engineer specializing in Java backend development, with a strong foundation in computer science and Information Technology with hands-on experience building database-driven applications. Skilled in designing and developing RESTful systems using Java, SQL, and modern development tools. Passionate about writing clean, maintainable code and building scalable solutions to real-world problems.

TECHNICAL SKILLS

Languages: Java, C#, Python, C++

Backend & Frameworks: .NET, REST APIs

Web: HTML, CSS, JavaScript

Databases: SQL, MySQL, MongoDB

Tools: Git, GitHub, Visual Studio, VS Code

Core Concepts: Data Structures & Algorithms, OOP, SDLC, System Design (UML, ERD)

PROJECT EXPERIENCE Information Management System (Final Year Project) C#, .NET, SQL

Designed and developed a full-stack, database-driven system

Implemented authentication and role-based access control

Built CRUD functionality with optimized SQL queries

Designed system architecture (UML) and database schema (ERD)

Desktop Application C++, Qt

Developed a GUI-based application using event-driven programming

Implemented input validation, data processing, and error handling

Applied OOP principles for modular and maintainable code

Personal Developer Portfolio Website HTML, CSS, JavaScript

Designed and deployed a responsive portfolio website

Showcases projects and GitHub repositories

Managed version control using Git and GitHub

ADDITIONAL EXPERIENCE

Built console applications in Java, Python, C#, and C++

Collaborated on group projects using Git and Agile practices

Designed system workflows and diagrams using Draw.io

EDUCATION

Bachelor of Science in Computer Science & IT

University of KwaZulu-Natal

CERTIFICATION

AWS Cloud Practitioner Essentials
